

FORT STOCKTON MIRACLE WELL CONTINUES TO MAKE GOOD AS PRODUCER; FLOW DECREASES

By ROY K. EMMER.

FORT STOCKTON, Texas, Jan. 18.—Well No. 18 of the Grant Oil corporation, which has been producing oil since it was drilled in last Wednesday, continues to make good as a producer. Due to an increased flow the well is pumping Sunday afternoon to save the overflow oil, after which the well was put on pump for nearly half an hour and produced at the rate of about 20 barrels. The flow, which has decreased from a four foot spout to a bubbling overflow, was not decreased by the pumping.

Automobiles kept arriving at the well all Sunday afternoon, between 10 and 150 people viewing this well and four others standing 100 feet from the well within a radius of 50 yards. It is estimated that 75 newcomers arrived here Sunday, about 100 having come since well No. 18 came in. Visitors are permitted to approach and give the well such examination as they wish.

Idle Hens Start Laying 104 Eggs, Instead Of 5

Steady Egg Gain Each Week for Mrs. Pierce in Winter Weather.

The week before we tried Don Sung, we got 5 eggs, from 10 hens. The first week, from a package of Don Sung, we got 13 eggs, and the next week 104. Some of our hens are more pullets and Don Sung started them laying. Mrs. J. Y. Pierce, R. P. D. 1, Butler, Texas.

Mrs. Pierce selected a severe time for her test—the middle of January. Yet she got the eggs. Your hens can lay well in cold weather, and we'll prove it.

Give your hens Don Sung and watch results for one month. If you don't find that it pays for itself and gets you a good profit besides, simply tell us and your money will be cheerfully refunded.

Don Sung (Chinese for egg-laying) is a scientific tonic and conditioner. It is easily given to the feed, improves the hen's health and makes her stronger and more active. It keeps up the egg-laying organ and gets the eggs, no matter how cold or wet the weather.

Don Sung can be obtained promptly from your druggist or poultry remedy dealer, or send 50c (includes war tax) for a package by mail prepaid. Burdett-Cover, Inc., 214 Columbia Bldg., Indianapolis, Ind.—Ad.

WHEN you enter a cigar store you will notice that the La Azora box is prominently displayed in the show-case.

Dealers in cigars have long ago learned the universal popularity of La Azora.

In every city in the United States La Azora continues to win thousands of enthusiastic boosters.

La Azora is the symbol of a good cigar—the finest cigar value that can be offered.

Remember the famous La Azora label.

Ask for La Azoras, the GUARANTEED cigars.

How you will enjoy them!

BREWSTER OIL ACTIVITIES ARE GIVEN IMPETUS

Alpine, Tex., Jan. 18.—Oil activities in Brewster county have received impetus from reports concerning the well of the Grant Oil corporation.

Many of the inquiries received here are concerning the Wilson No. 1 and Wilson No. 2, of the Fossil Oil company. Wilson No. 1 is the only well in Brewster county which has produced oil in any considerable quantities. After several thousand barrels worth of oil had been taken from the well, a casing was dropped, putting a stop to production. The company believed it cheaper to drill another well on the same site than to right the damage at Wilson No. 1 and began drilling Wilson No. 2 within 100 yards of the first producer. Wilson No. 2 is now down over 400 feet and is being drilled with fuel oil taken from Wilson No. 1.

Port Stockton Oil syndicate, section 29, block 14, T. & S. railway survey, well No. 4, oil standing at top of casing, depth 51 feet; No. 2, section 18, drilling at 230 feet; No. 3, standard rig drilling 541 feet; No. 4, oil standing 130 feet deep; No. 5, oil standing 213 feet; No. 6, oil standing 162 feet.

Port Stockton Oil syndicate, well No. 7, oil standing 130 feet deep; No. 8, oil standing 130 feet deep; No. 9, oil standing 130 feet deep; No. 10, oil standing 130 feet deep.

Port Stockton Oil syndicate, well No. 11, oil standing 130 feet deep; No. 12, oil standing 130 feet deep; No. 13, oil standing 130 feet deep; No. 14, oil standing 130 feet deep.

Port Stockton Oil syndicate, well No. 15, oil standing 130 feet deep; No. 16, oil standing 130 feet deep; No. 17, oil standing 130 feet deep; No. 18, oil standing 130 feet deep.

Port Stockton Oil syndicate, well No. 19, oil standing 130 feet deep; No. 20, oil standing 130 feet deep; No. 21, oil standing 130 feet deep; No. 22, oil standing 130 feet deep.

LUMBER PRICE FORCES MILLS TO SHUT DOWN

By G. A. MARTIN.

Indians and also to visit the lava beds, the highest in the southwest.

The town has several comfortable hotels, but needs a large one. The people would be willing to take considerable stock in such an institution to show their faith in it and to guarantee success to the promoters.

Work on Roads. The streets of the city are paved with bituminous asphalt, a part of the National Old Trails road is being built through the county at present of this material. The work has been temporarily stopped on account of the frost—it gets cold here in winter, because of the altitude, which is around 7000 feet—but work will be continued next spring.

Flagstaff is a great wool center, also a big center for the sale of Navajo and Indian blankets. It is the home of the Northern Arizona Normal school and of the observatory, which stands upon the mountainside upon a white spot on a beautiful background of green, the pines all about lending the scene a softness and beauty.

At present a road runs from here to the Grand canyon, along the canyon rim to El Tovar, and thence on to Williams, west of here. It is 24 miles from here to El Tovar and 55 miles from El Tovar back to Williams. The road is a fine one, and the scenery is beautiful. The road is a fine one, and the scenery is beautiful.

The country has a population of 10,000 people and the assessed valuation is \$12,000,000 or \$120 per capita, making it one of the richest counties of the state and possibly the richest outside the big mining producing counties.

This is the former home of Ralph Cameron, United States senator-elect. He was sheriff of the county in the early days, and while serving in that office, located the Cameron trail, 14 miles east of El Tovar, to the bottom of Grand canyon, building it originally to some mining claims he had taken up in the canyon. He had a hard fight for many years with the Santa Fe railroad, later over the Bright Angel trail, forcing the company for a time to pay him toll for every passenger who traversed it, but he finally lost the suit when the court ruled that he could not hold the right of way as a mineral claim.

He still owns some mining claims and "the Indian gardens" down in the canyon. Because of its high altitude, the summer climate of Flagstaff is unsurpassed and tourists often stop here.

Getting Its Name. The way the town of Flagstaff was named was peculiar. Horace H. Mann, the pioneer who named the place, is still living and is now very ill in a Phoenix hospital. He is suffering from a severe fall. He is said to have had almost every bone in his body broken by falls at some time or other in his life and this is just another misfortune, which he smiles at and bears with the fortitude becoming a man who has lived through so much.

It is said that when he located the present site of Flagstaff, he climbed a tall pine tree to get a better view of the place and named it after the flag he saw flying from a flagpole on top of the mountain. It was done so much in defiance of the Indians who were then in the place and who were very hostile to him.

A Typical Day-After Incident. It is told of him that he was one of the best shots in the territory of Arizona and it is said that when he was a hunter he was once on a stag on which he was a passenger, he coolly said to the hunter and said to him, "I will kill you." looking all the while directly at the highwayman out of a pair of eyes that were as cold as steel.

For a moment the situation was tense. Every passenger on the stage expected the hunter to send a bullet through the brave old man's heart, but he didn't. Instead he dropped his gun and said, "I believe you do it," turned on his heel and walked away.

Such is the stuff of which Arizona pioneers were made.

14 Years Ago Today

From The Herald of This Date, 1907

BEFORE an assembly of several hundred citizens and the student body of the Agricultural and Mechanical college of New Mexico, Gov. Charles H. Johnson, of New Mexico, this afternoon placed the cornerstone for the student Y. M. C. A. building, which is to be erected on the college campus. G. G. Tins, secretary of the Y. M. C. A. in New Mexico, who was largely responsible for the organization of the student Y. M. C. A. in Las Cruces, also made an address.

Work on finishing the paving on Mesa avenue at both the railroad and the San Antonio street intersection will be completed by the Texas Building company this afternoon.

General freight agent H. H. Hays of the Mexican Central, was in the city yesterday and left for Mexico City this morning.

Lans Jackson, wife and boy, have returned from San Antonio, after a visit of several days.

An effort to organize a fair association in El Paso is to be made. At a meeting of the chamber of commerce the directors at the request of Frank Lenke, manager of the Franklin hotel, instructed secretary W. J. Tilton to call a meeting of the business men. Mr. Lenke and W. J. Austin, of Austin & Marr, appeared before the directors.

Memorial to "Babe" Ruth Is Proposed By Gibbons

New York, Jan. 18.—Cardinal Gibbons has proposed a memorial to "Babe" Ruth, champion home run hitter, center fielder, and a singular honor himself.

In a letter read at a meeting of the supreme board of directors of the Knights of Columbus, the cardinal urged that St. Mary's industrial school at Baltimore, an enclosed, fire-damaged and which recently was destroyed by fire; be replaced by the Ruth school for dependent and ward boys. Brother Paul, head of the institution informed the directors that the citizens of Baltimore had proposed to erect a new building in honor of the cardinal, but that he suggested their efforts be diverted to rebuilding the school.

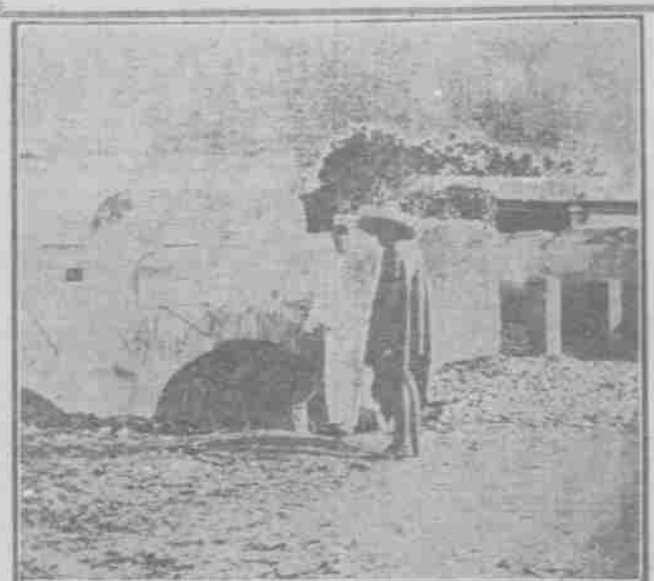

HADFIELD TO HELP ORGANIZE ROSWELL KIWANIS CLUB

H. P. Hadfield left Sunday for Roswell to complete the organization of a Kiwanis club. While at Roswell, Mr. Hadfield will try to interest real estate men in the organization of a realty board. He is president of the El Paso real estate board.

BRITISH FOREIGN TRADE.

London, Eng., Jan. 18.—British imports for 1920 were \$1,312,000,000, an increase of \$118,000,000 over 1919. Exports amounted to \$1,320,000,000 for 1920, an increase of nearly \$100,000,000 over 1919.

Picturesque Mexico: Queretaro

The town was founded in 1430 by the Otomian Indians. The Indians show it as Tzacu, from a Tzotzil Indian word signifying ball or a place where ball games were played. It became one of the Aztec outposts when the Otomian Indians were conquered by Montezuma.

It was not until 1521 that the Spaniards captured it and began building the first of the scores of magnificent churches that now dot the city. The Spaniards named it Queretaro, but the name was soon thereafter changed to Santiago de Queretaro, because of an alleged manifestation during a fiesta of Santiago (St. James). The town became a ciudad, or city, by order of King Philip IV, of Spain, in 1563.

At present a road runs from here to the Grand canyon, along the canyon rim to El Tovar, and thence on to Williams, west of here. It is 24 miles from here to El Tovar and 55 miles from El Tovar back to Williams.

Many days in traveling through the country by automobile, enjoying the cool days and the cooler nights as they motor out to the various points of interest hereabouts.

El Pasos Who Remember It. A Schwartz of El Paso will remember late as the place where the girls from the normal school almost dined him in 1917, when he was here with the El Paso trade commission and the girls "ruined" us all for our yellow and black caps and ribbon decorated caps.

This is the place also, where "Uncle Bill" Roe received the famous telegram from home, on which, after paying \$2.19 collect charges to A. Matthias he learned that it had been faked by somebody on the train. He so stated in a letter to the telegram was not genuine, however, that he did not regret the cost of the message.

Getting Its Name. The way the town of Flagstaff was named was peculiar. Horace H. Mann, the pioneer who named the place, is still living and is now very ill in a Phoenix hospital. He is suffering from a severe fall. He is said to have had almost every bone in his body broken by falls at some time or other in his life and this is just another misfortune, which he smiles at and bears with the fortitude becoming a man who has lived through so much.
